

Teleflex Academy presents “We Need an Airway and Access Now!”

Date: Wednesday 8th October 2014

Time: 11:00 – 13:00

Facilitators: Kate Sykes (RN, BN, TAA)

Karen Bone (RN, Post Grad Cert ICU, Cert IV Workplace Training and Assessment)

Time is critical in establishing a secure airway and vascular access in a critically ill patient. Delays in airway or vascular access have grave consequences and increase morbidity and mortality rates. In this two hour interactive workshop, a clinical scenario is utilised to demonstrate the complexity and challenges presented by this patient group. Learning will be reinforced through a hands on approach utilising a difficult airway algorithm, optimal IV access options and valuable practice time.
