The role of the emergency nurse in Vietnam can be very challenging. International SOS clinic, HCM is staffed by 16 registered nurses who all participate in a number of areas of the clinic including triaging patients and taking vital signs on admission, in-patient care, emergency care, health check and evacuation/repatriations of patients.

A combination of diverse medical presentations, logistics and cultural challenges make for a very broad criteria for nursing. In this presentation I will discuss the role of the emergency nurse working in International SOS. How we practice and how we work towards quality improvement. The types of patients we seeing, and settings we are presented within Vietnam.
