

Establishing a Clinical Redesign position in Children's Health Queensland.

Therese Oates¹,

¹ Department of Emergency Medicine Royal Children's Hospital Children's Health Queensland. Herston Rd Herston, QLD 4006.

Children's Health Queensland Hospital and Health Service is a service undergoing significant and widespread change. Integration of staff from the Royal Children's and Mater Children's Hospital's is planned for November 2014, when the Lady Cilento Children's Hospital opens doors for business. This dynamic environment provides the backdrop for CHQ staff to undertake aspects of integration, innovation and redesign across the entire health care spectrum, underpinned by the key elements contained within the Queensland Department of Health 'Optimising Nursing Strategy'. The Nurse Manager Clinical Redesign position aims to support CHQ staff in planning and implementing these innovative models of care, both in the Emergency Department and beyond, in order to benefit clinical integration, and provide expert, evidenced based care for the families and children accessing our health service. The presentation will outline some of the initiatives supported by the Nurse Manager Clinical Redesign role within CHQ.
